***Applicant's Response***

1. In Applicant's Response dated 10/30/2008, Applicant amends the claims and provides corresponding arguments that are persuasive. For example, applicant's arguments that are presented on page 7 (See arguments), where the difference in cultural interpretation is made by the system and Challapali or Richardson are not seen as determining a difference in cultural profile and then merging the emotional state of each user based on the cultural profile.

All objections and rejections previously set forth are withdrawn.

***Allowable Subject Matter***

2. Claims 1-2 and 5 are allowed.
3. The following is an examiner's statement of reasons for allowance

*Claim 1*

*The closest prior art of Challapali, Richardson, Chin and Tveskov each teach a mechanism for communicating via chat or instant messaging systems. Each system discloses a means for disclosing the emotion expressed by the user via the communication channel. Challapali teaches determining an emoticon based on the state of the user. Challapali suggests retrieving a profile of a user from a user profile database but does not teach determining a cultural profile by retrieving cultural profiles for each user and then translating the difference in profiles into an emoticon and merging the translated emoticon into the session. The prior art requires the user to select a dictionary or interpretation based on the user selected determination of the difference in cultural meanings. For example, Chin teaches a system that contains a hyperlinked dictionary that requires the user to view the dictionary that defines the desired communication in another user's language and then select the appropriate term. Chin does not disclose determining and translating from different profiles an emoticon and then merging the emoticon without user input. The prior art of Tveskov also teaches an iconic communication tool that relays emotions of the user via an icon to those on the communication channel. A user's profile is consulted based on whether the user can trade with another, which includes factors of determining similarity or differences in profiles*

Art Unit: 2179

*(See Para 56). In this embodiment the differences in profiles is used to determine if a user can communicate with another and icons based on the profile are presented. Tveskov does not disclose determining the differences and then presenting a translated emoticon into the session based on a difference in cultural profile. The prior art of GAO, teaches merging emoticons from a user from the determined emotion of the user based on pitch and tone but the system translates one language into another via a speech to text translator that compares the spoken phrase from one language to another (See Para 44). This is different from the present invention in determining the difference in emotion based on a cultural profile. For example, GAO teaches text translation for interpreting spoken text and then translates the symbolic meaning for another language and conveys the emotion to the user via an emoticon. The difference in the present application is the cultural profile is compared between two users and then an emoticon is merged into the communication based on the difference. The difference in emotional states is determined rather than a difference in languages translated into text that is interpreted to convey emotion. No profile is referenced in GAO. Therefore the prior art does not teach the combined limitations as recited in the claims and is allowable over the prior art.*

#### *Claims 2 and 5*

These claims are dependent upon Claim 1 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. Theriault whose telephone number is (571) 272-5867. The examiner can normally be reached on M-F 7:30 - 4:00 PM.
